

Lumino

- There should be more photos of the Lumino churches as we have visited many times and originally to come in from Kenya. Without the photos we did not want to give testimony to the brothers and sisters in Lumino. The first place we saw people healed of HIV with medical evidence. Lumino is not too far from the Kenya border. They have built a beautiful building to replace the old one which when visited was very wet and muddy and finding a dry place to preach was a problem.

Francis Ounda is our contact there

Bishop Fred's house is not too far away and some photos are of his the church his wife Rosette' home church.
